Interim Report
First 6 Months 2018/19

Analyst Conference Call
on May 15, 2019
Operating earnings before taxes down on the very good previous year

Market environment

Trend in significant market prices and refining charges

100 % = Sept. 2016
- European refining charges for copper scrap
- Sulfuric acid price (spot CFR Brazil)
- Exchange rate (US$/€)
- TC/RCs for copper concentrates (contract)
- Copper premium
Operating EBT significantly below previous year

Energy costs in the Aurubis Group

Breakdown of energy costs in the Aurubis Group (first 6 months of FY 2018/19)

- Electricity: 59%
- Gas: 16%
- Liquid fuels: 5%
- Oxygen: 18%
- Other energy: 2%

Energy costs in the Aurubis Group in the first half-year:
€ 99 million (previous year: € 87 million)
**Key figures remain very robust and provide room for future growth**

(Quantities in 1,000 t)

- Substantially lower concentrate throughput with lower TC/RCs
- Unscheduled shutdowns in Hamburg, Pirdop, and Lünen in Q1 2018/19 led to negative effect of approx. € 25 million
- Significantly lower refining charges for copper scrap compared to previous year, but still at a good level
- Higher sulfuric acid revenues due to price factors despite lower production volumes
- Increased energy costs
- Robust sales at a high level for Rod & Shapes
- Positive contributions from our efficiency improvement program

* Rolling EBIT last 4 quarters
Operating results for Segment Flat Rolled Products (FRP) (first 6 months 2018/19)

<table>

<td>110</td>
<td>116</td>
</tr>
</tbody>
</table>

* Operating EBT down significantly because of lower sales volumes and less favorable supply conditions compared to previous year

* Sales volumes below previous year due to lower demand, especially from automotive sector
Efficiency improvement program: On schedule

Target: Project success > € 200 million (base year: 2014/15)

(in € million)

» Measures for 2018/19 have been identified and are being implemented
» We are currently on schedule and we maintain our goal of € 200 million project success
» All of the company’s divisions are contributing to project success, including both production and the corporate functions
» Possible deterioration of market conditions, as compared to reference year 2014/15, could have a counter-effect
Copper price: average 2019 copper price forecast at US$ 6,505/t (Reuters poll 05/2019)

Copper concentrates: good supply with satisfactory TC/RCs expected

Plant availability at our primary copper smelters below previous year; copper concentrate volume processed thus expected to be significantly lower

Unplanned (Q1) and planned shutdowns will impact our operating result

Sulfuric acid markets signal high demand with stable prices

Copper scrap: satisfactory supply volume and refining charges at a good level

Aurubis Copper Premium: US$ 96/t (2018: US$ 86/t) established for European customers for 2019

Rod: lower demand driven by a weaker economic trend

Shapes: demand situation at prior-year level

Flat rolled products: significantly lower demand situation

Efficiency improvement target of additional € 60 million project result, based on conditions of 2014/15, is expected to be reached

US dollar effect at prior-year level

For FY 2018/19, we expect a significantly lower operating EBT and a significantly lower operating ROCE for the Aurubis Group compared to the 2017/18 reporting year.
Additional investments at the Pirdop site in the course of a legally mandated planned shutdown in May/June 2019

Financial impact:
» Capex: approx. € 19 million (FY 17/18: approx. € 10 million, FY 18/19: approx. € 9 million)
» EBT effect: approx. € 15 million
» Concentrate throughput effect: approx. 88,000 t

Key data for the measure
» Description: Boiler repair/replacement of the catalyst mass in the contact plant boiler
» Time period: May/June 2019; approx. 22 days
» Supply reliability: Scheduling takes place group-wide in close cooperation in order to guarantee optimal anode supply within the Group
» Additional benefit: Measure is associated with forward-looking investments at the site: for example, backup rectifier in the tankhouse and regulatory inspection
October/November 2019: Legally mandated planned shutdown at our Hamburg site

Financial impact:
» Capex: approx. € 45 million
» EBT effect: approx. € 30 million
» Concentrate throughput effect: approx. 125,000 t

Key data for the measure
» Description: Overhaul of waste heat boiler to comply with legal deadlines, replacement of two converter vessels, relining of anode furnace, renovation of heat exchangers in the acid plant
» Time period: Oct/Nov 2019; approx. 36 days
» Supply reliability: Scheduling takes place group-wide in close cooperation in order to guarantee optimal anode supply within the Group
