

Image Component

i The image component offers various options to enrich the content with great pictures. Learn how to use it with the following screenshots and explanations:

Screenshot	explanatory notes
1	- Images are composed on a page with the image component. - A component can be selected after the site contains the structuring elements section and rows. See also Section & Grid
2	 - Adding a new component inside a row opens this overlay menu with all components available. - Please select the “Image” component and click “next”

3

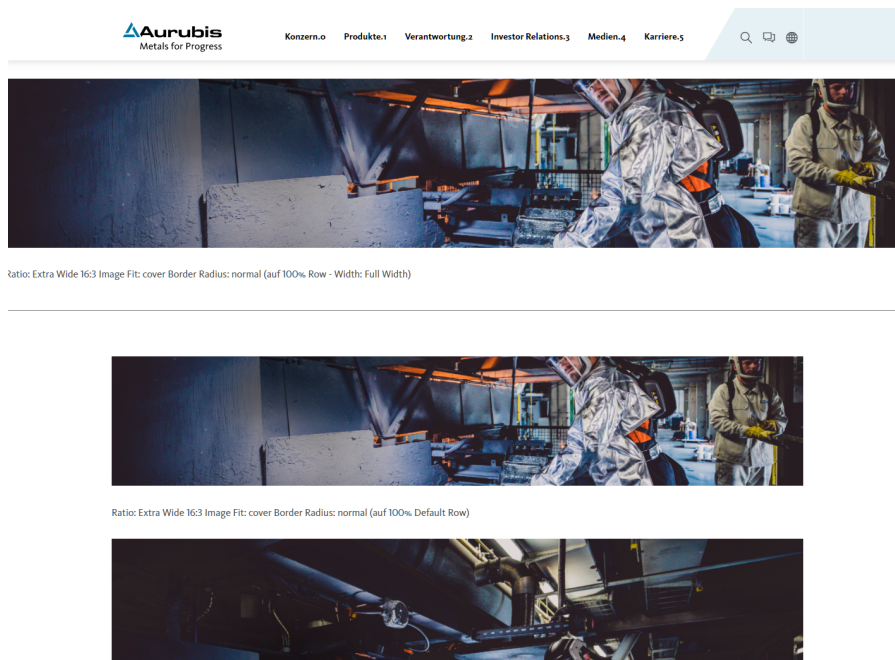

- Now you are directly inside the administration overlay of the image component.
- With the drop down menus the following options are available:

1. Ratio (these are the images sizes and dimensions the system can automatically adjust)
 - a. Extra Wide 16:3
 - b. Landscape 16:9
 - c. Original
 - d. Photo 3:2
 - e. Portrait 4:5
 - f. Square 1:1
 - g. Video 4:3
2. Image Fit
 - a. contain (shows the whole image but may display white/grey areas)
 - b. cover (covers the whole area but may clip the image)
3. Style
 - a. normal
 - b. circle
 - c. rounded
4. Image
 - a. "Select new" opens the ASSET App, then select the image (asset) you need
5. Link
 - a. type in a title
 - b. choose the kind of link
 - i. asset
 - ii. external
 - iii. internal
 - iv. anchor target
 - c. set the asset link/external or internal URL or the anchor target.

- Don't forget to save your adjustments
