

2021 Aurubis Modern Slavery and Human Trafficking Statement

This slavery and human trafficking statement has been published in accordance with section 54(1) of the UK Modern Slavery Act 2015. It sets out the steps Aurubis took during fiscal year 2020/21 (Oct. 1, 2020 - Sept. 30, 2021) to identify and address modern slavery and trafficking risks.

This statement is published for Aurubis AG and on behalf of the Aurubis Group companies, including Aurubis UK Ltd. Although not all Aurubis Group companies are subject to the Act, Aurubis takes a group-wide approach to its human rights commitments.

Aurubis UK is a precision shearing and metals service center and is part of the Aurubis Group.

Organizational structure and supply chains

Aurubis AG is a company in the basic materials industry that operates worldwide. As an integrated group, we process complex metal concentrates, scrap metals, organic and inorganic metalbearing recycling raw materials, and industrial residues into metals of the highest purity. In addition to our main metal, copper, our metal portfolio also includes gold, silver, lead, nickel, tin, zinc, minor metals such as tellurium and selenium, and platinum group metals. Sulfuric acid, iron silicate, and synthetic minerals round off the product portfolio.

The company is based in Hamburg, Germany, where its headquarters and key production facilities are located. Most of our sites are located in Europe, with larger production centers in Germany, Belgium, Bulgaria, and Spain as well as cold-rolling mills for flat rolled products, slitting centers, and rod plants in Germany and elsewhere in Europe. Outside Europe, Aurubis also has a production site in the US, and a global sales and service network.

We process copper concentrates, copper scrap, other

metal-bearing recycling materials, and bought-in intermediates as feed material. Because we have no stakes in mines, we have to buy the necessary raw materials for our two primary smelters, located in Hamburg and Pirdop, on the international market. Aurubis has a global, diversified supplier portfolio; we source a significant portion of our copper concentrates from South American countries such as Peru, Chile, and Brazil. We also purchase raw materials from other countries like Bulgaria, Georgia, and Canada. Most of the copper scrap and metal-bearing recycling raw materials for our four secondary smelters in Lünen (Germany), Olen, Beerse (both in Belgium), and Berango (Spain) are sourced in the European and North American market. For primary raw materials, we value long-term relationships and strategic cooperation with our suppliers. Compared to primary raw materials, secondary raw materials are largely purchased on the basis of short-term supply contracts.

For further details on our products and company structure, please see the [Aurubis Annual Report 2020/21](#).

Policies related to slavery and human trafficking

We respect human rights, advocate for their protection, and adhere to the recognized core labor standards set out by the International Labour Organization (ILO). The Executive Board is responsible for the issue of respect for human rights as implemented in our business activities. We have participated in the United Nations Global Compact since December 2014 and are thus committed to implementing its Ten Principles, including Principle 4, the elimination of all forms of forced and compulsory labor. The [Aurubis Human Rights Commitment](#) summarizes Aurubis' understanding of its due diligence obligation regarding human rights, as well as the key elements of this obligation. It is aimed at all employees, business partners, and other partners of the

Aurubis Group. Our commitment to human rights is also included in the [Aurubis Code of Conduct](#) for employees.

In our view, our responsibility to uphold human rights extends to the supply chain. With our business partners, we seek to share the same values and standards in respect of human rights, labor rights, the environment, and business ethics. These standards are outlined in the [Aurubis Business Partner Code of Conduct](#).

In addition, we include a clause in our – usually long-term – supply contracts in which we state that we expect our suppliers of primary raw materials to follow not only local laws but also UN sanctions and trade restrictions, as well as UN conventions related to human rights, environmental protection, and safety. This clause is a component of almost 90 % of our supply contracts for primary raw materials.

We call on all employees to report any cases of non-compliance with the policies and codes mentioned above to their HR departments or the chief compliance officer. Our employees and business partners can report these types of cases anonymously through our [whistleblower hotline](#) as well.

Due diligence processes and risk assessment and management

Our due diligence in selecting suppliers has been supported by our Business Partner Screening since 2015 and applies to suppliers of both primary materials and secondary materials. The system is implemented at our sites in Hamburg, Lünen (both Germany), Olen (Belgium), and Pirdop (Bulgaria), as well as for several smaller sites. The Beerse (Belgium) and Berango (Spain) sites added in fiscal year 2019/20 have a comparable system as well.

Using this tool, we analyze our business partners in a structured manner with regard to their integrity relating to social and ecological criteria, including modern slavery

and human trafficking. The screening is guided by the OECD Due Diligence Guidance for Responsible Mineral Supply Chains.

Our corporate policies on Business Partner Screening establish responsibilities and processes within the Group. The Procurement and Sales departments are responsible for implementing this screening. We use internally configured software for screening across the Group. It assesses risks related to financial, tax, and criminal law aspects, as well as risks relevant to sustainability, including human rights risks. The result includes a profile that, in the case of increased risk, leads to additional research by the Commercial, Compliance, and Sustainability departments.

Based on this assessment, management decides on possible contracts or restrictions. The analysis is repeated regularly depending on the development of the individual risk. New partners are reviewed before any contracts are signed.

The Sustainability and Compliance departments advise the Commercial division during the Business Partner Screening process with regard to human rights and raise awareness for critical issues in this area.

Effective action taken to address modern slavery

For fiscal year 2020/21, we are not aware of any cases of forced labor, modern slavery, or human trafficking related to our operations, business relationships, or supply chains. No cases or complaints were reported through the whistleblower hotline.

The Executive Board Chairman has approved the Aurubis Modern Slavery and Human Trafficking Statement.
