Overview

About the ESG Factbook

GRI 2-3, GRI 2-4
For the first time, our annual report includes disclosures aligned with the European Sustainability Reporting Standards (ESRS), which are presented in our (Group) Sustainability Statement 2024/25 [annualreport2024-25.aurubis.com](#). The ESG Factbook 2024/25 is designed to advance Aurubis’ commitment to transparent, data-driven sustainability reporting. Serving as both a supplement to the annual (Group) Sustainability Statement and a standalone reference, the ESG Factbook provides stakeholders with comprehensive insights into the company’s environmental, social and governance (ESG) performance. It consolidates disclosures aligned with the Global Reporting Initiative (GRI) and the European Sustainability Reporting Standards (ESRS) and includes additional key performance indicators (KPIs) relevant to our alignment with the Sustainable Development Goals (SDG) and with our EcoVadis, CDP and other ratings.

The reporting period for the ESG Factbook is the 2024/25 fiscal year, spanning October 1, 2024 to September 30, 2025. Most environmental KPIs are presented for this fiscal year, while select metrics are reported on a calendar-year basis to meet internal management and regulatory requirements. The scope of consolidation covers all fully consolidated subsidiaries as of the fiscal year-end, mirroring the annual report. It excludes Schwermetall Halbzeugwerk GmbH & Co. KG, in which Aurubis holds a 50 % stake, and the Cabo GmbH joint venture with the TSR Recycling GmbH & Co. KG recycling company, in which Aurubis has held a 40 % stake since June 1, 2021. The environmental and energy KPIs are reported for production sites that are majority-owned (>50 %) by Aurubis [Sites and employees](#). This reflects the majority of energy consumption and emissions. The volumes from the sales offices are negligible in comparison. Copper production mentioned in the context of environmental KPIs refers to primary and secondary copper production at the Hamburg, Lünen, Olen, Pirdop, Beerse and Berango sites. Any deviations from the scope of consolidation are expressly stated for the relevant figures.

Expanding industrial leadership in sustainability

Our strategy defines sustainable action and management as a central consideration across all areas of the company. We continue to anchor sustainability throughout the entire company and in all of our workflows, processes and strategic projects in particular, based on binding targets and appropriate measures. We also acknowledge the importance of sustainability in our organizational structure: The Sustainability department is positioned at the highest level directly in the CEO’s business division.

Relevant fiscal data

Overview

	Unit	2024/25	2023/24
Operating earnings before taxes (EBT)	€m	355	413
ROCE (return on capital employed)	%	8.8	11.5
R&D expenditure	€m	17	14
Environmental protection investments	€m	155.4	214.4
Environmental protection investments since 2000 (cumulative)	€m	1,172.0	1,050.9

¹ The plant is also certified through WEEELABEX in accordance with the European EN 50625 series of standards. The certificate confirms that waste electrical and electronic devices are efficiently handled and disposed of while minimizing the environmental impact.

² Not majority-owned by Aurubis (50 % stake).

Further information:

EMAS: system with guidelines for environmental management systems and environmental audits

ISO 14001: standard for environmental management systems

ISO 50001: standard for energy management systems

ISO 9001: standard for quality management systems

IATF 16949: standard for quality management systems in the automotive industry, based on ISO 9001

EfbV: Ordinance on Specialized Waste Management Companies (German certificate)

ISO 45001: standard for occupational safety management systems

ISO 27001: standard outlining requirements for information security management systems

United Nations Sustainable Development Goals

The United Nations Sustainable Development Goals (SDGs) provide a global framework for addressing the most pressing environmental, social and economic challenges. Aurubis supports the SDGs through its core business activities, sustainability strategy, and partnerships across its value chain. Our actions focus on areas where we can have the greatest positive impact while managing our responsibilities as a global copper producer.

United Nations Global Compact

We have also been a signee of the United Nations Global Compact (UNGC) since 2014 and are committed to implementing its Ten Principles related to human rights, labor, environment and anti-corruption. Every year, we report our progress on implementing these principles to the UNGC. Further information can be found on the website of the UNGC [Communication on Progress \(CoP\)](#). We are also a member of the national chapters of the UNGC in Germany and Bulgaria.

Our contribution to the 17 Sustainable Development Goals

- 

GOAL 3: Vision Zero management approach to preventing work-related accidents and injuries | occupational safety anchored in supply chain management | preventative measures to protect health
- 

GOAL 4: promoting vocational training in apprenticeship programs | professional development options for the workforce | supporting educational projects in social engagement
- 

GOAL 5: targets for women in leadership positions | cross-company Women4Metals network | support for a social recycling project led by female entrepreneurs
- 

GOAL 6: regular assessment of water management including water risk audits | support for a water protection project involving international social engagement
- 

GOAL 7: management approach for efficient energy use and the use of renewable energy sources | Aurubis as an energy provider through industrial heat

- 

GOAL 8: commitment to UN Guiding Principles on Human Rights at group sites and in the supply chain | promoting digitalization, diversity and co-determination
- 

GOAL 9: use of our metals for CO₂ reduction, e.g.: in electric vehicles and offshore wind turbines | core business recycling solutions | innovative processes for more sustainable production
- 

GOAL 10: fostering diversity and equal opportunities in the workforce and supply chain | commitment to diversity | social engagement projects to promote participation
- 

GOAL 12: energy conservation and responsible use of finite resources through metal recycling | supplying raw materials for the energy and mobility transition
- 

GOAL 13: decarbonization roadmap aiming for carbon neutrality before 2050 | climate protection anchored in supply chain management | identification of climate-related risks to develop climate strategies | innovative testing for decarbonization (hydrogen, ammonia)

- 

GOAL 15: environmental management approach at all production sites | environmental protection anchored in supply chain management | support for social projects that focus on environmental protection
- 

GOAL 16: principles for good corporate governance | commitment to German Federal Lobbying Act | fight against corruption
- 

GOAL 17: stakeholder engagement through open dialogue on sustainability topics | involvement in initiatives and projects for sustainable development

ESG ratings and awards

ESG ratings

For many years, we have ensured our sustainability achievements are transparent in a variety of ways. These include reporting in the Non-Financial Report, Sustainability Report, and KPI Update in the past and, currently, in the (Group) Sustainability Statement and the ESG Factbook. Participating in sustainability rankings and ratings has also been crucial in our ongoing efforts to provide a high level of transparency.

We are especially proud to have received EcoVadis' platinum medal in 2025, putting us in the top 1 % of rated companies.

We are also rated by organizations such as MSCI, Sustainalytics, ISS ESG, S&P Global, and Bloomberg ESG, in addition to participating in the CDP rating.

More information can be found on our website www.aurubis.com/en/responsibility/reporting-kpis-and-esg-ratings.

Aurubis honored with the 17th German Sustainability Award

Aurubis received the most comprehensive award of its kind in Germany for its pioneering role in sustainability and was recognized for its activities in carbon-neutral and circular metal production. Aurubis also numbered among the finalists for the 15th German Sustainability Award in 2022 and has intensified its efforts to promote sustainability even further since then.

ESG ratings: What analysts have to say

CDP Climate Change	2025 thematic score: B
CDP Water Security	2025 thematic score: A-

Aurubis has completed the CDP climate questionnaire since 2015 and the CDP water security questionnaire since 2021

EcoVadis	2025 score: 85/100 (platinum medal)
----------	-------------------------------------

Achieved: EcoVadis platinum medal | Aurubis is in the top 1 % of rated companies

MSCI ¹	2025 rating: A
ISS ESG corporate rating	Prime status since 2012 2025 rating: B+
Sustainalytics ²	2025 management score: 66.3/100 (strong)

Ranked 4th of 182 in the industry in Sustainalytics for 2025

S&P Global (CSA)	2025 CSA score: 54/100
Bloomberg ESG	4.93 as of December 2025 (better than 75 % of companies in the iron and base metals category)

Disclaimers for ESG ratings:

- ¹ MSCI: The use of any data of MSCI ESG Research LLC or its affiliates ("MSCI") by Aurubis, as well as the use of MSCI logos, trademarks, service marks, or index names herein, does not constitute a sponsorship, endorsement, recommendation, or promotion of Aurubis by MSCI. MSCI services and data are the property of MSCI or its information providers, and are provided "as is" and without warranty. MSCI names and logos are trademarks or service marks of MSCI.

Aurubis 2030 sustainability targets

Topic	Ambition	2030 targets
€ Economy		
Governance and ethics	We uphold the principles of responsible corporate governance.	
Recycling solutions	We offer comprehensive value chain solutions for the circular economy.	Up to 50 % average recycling content in copper cathodes.
Responsible supply chain	We minimize negative impacts on people and the environment in our supply chains.	Doubling the number ¹ of certified or audited sources for copper-containing concentrates.

¹ FY 2024/25 reference value: 25 % of copper sources have been certified or audited.

Topic	Ambition	2030 targets
🌱 Environment		
Energy and climate	We will be carbon-neutral before 2050.	-50 % absolute Scope 1 and Scope 2 emissions (reference year 2018). ² -24 % Scope 3 emissions per ton of copper cathode (reference year 2018). ³
Environmental protection	We produce with the smallest environmental footprint in our sector.	-15 % specific dust emissions in g/t multimetal copper equivalent.

² Evolving market dynamics, regulatory changes, technological advancements, and competitive pressures in a global environment as well as investment decisions for future growth projects may influence the feasibility of our targets. These internal and external factors will be considered during target reviews.

³ Refers to internally produced copper cathodes.

Topic	Ambition	2030 targets
👤 People		
Health and safety	We prevent work-related accidents, injuries and illnesses (Vision Zero).	LTIFR < 1.0
Future-oriented employer	We create a work environment for close collaboration and promote diversity and commitment. We passionately work for the progress of the company and society.	100 % of our employees receive adequate wages. 100 % of relevant employees receive training on unconscious bias and anti-discrimination.
Training and education	We provide high-quality vocational training and invest in forward-looking qualifications for employees.	100 % fulfillment of the training quota in hours (training quota: 18 hours per year and employee).
Social engagement	Locally and internationally, we are a reliable partner that is making a lasting contribution to a livable environment.	80 % long-term partners (percentage of total budget). €2 million annual budget for social engagement.

Environment

Energy and climate

Energy consumption

GRI 302-1
ESRS E1-5 — Energy consumption and mix

Energy consumption from non-renewable sources	Unit	2024/25
(1) Fuel consumption from coal and coal products	MWh	104,054
(2) Fuel consumption from crude oil and petroleum products	MWh	270,238
(3) Fuel consumption from natural gas	MWh	1,210,832
(4) Fuel consumption from other fossil sources	MWh	24,770
(5) Consumption of purchased or acquired electricity, heat, steam, and cooling from fossil sources	MWh	1,246,064
(6) Total fossil energy consumption (calculated as the sum of lines 1 to 5)	MWh	2,855,957
Share of fossil sources in total energy consumption	%	91
(7) Consumption from nuclear sources	MWh	71,593
Share of consumption from nuclear sources in total energy consumption	%	2
Energy consumption from renewable sources		
(8) Fuel consumption for renewable sources¹	MWh	2,954
(9) Consumption of purchased or acquired electricity, heat, steam, and cooling from renewable sources	MWh	148,975
(10) The consumption of self-generated non-fuel renewable energy	MWh	60,813
(11) Total renewable energy consumption (calculated as the sum of lines 8 to 10)	MWh	212,742
Share of renewable sources in total energy consumption	%	7
Total energy consumption (calculated as the sum of lines 6, 7 and 11)	MWh	3,140,292

¹ Includes industrial and municipal waste of biologic origin, biogas, hydrogen from renewable sources.

Energy intensity per net revenue¹

GRI 302-3
ESRS E1-5 — Energy consumption and mix

in MWh per € million	2024/25
Total energy consumption per net revenue	173

¹ Turnover is not segmented pursuant to NACE codes in the financial reporting, so we base the calculation of the metric on total turnover. Aurubis does not view this metric as relevant for control purposes, since it neither conveys the specific demands of the business model, nor does it ensure a meaningful comparison between different periods. The calculation is based on the turnover provided in the Consolidated Financial Statements, see [Consolidated Financial Statements](#), [Consolidated Income Statement](#).

Renewable and non-renewable energy production

ESRS E1-5 — Energy consumption and mix

in MWh	2024/25
Non-renewable energy production	7,875
Renewable energy production	60,813

CO₂ emissions in FY 2024/25

GRI 305-1, GRI 305-2, GRI 305-3, GRI 305-4, ESRS E1-6 — Gross Scopes 1, 2, 3 and Total GHG emissions

	Retrospective		Milestones and target years (calendar years)				
	Unit	2024/25	Base year	2025	2030	2050	Annual % of target / base year
Scope 1 GHG emissions							
Gross Scope 1 GHG emissions	1,000 t CO ₂ eq	501.55					
Percentage of Scope 1 GHG emissions from regulated emission trading schemes	%	93					
Scope 2 GHG emissions							
Gross location-based Scope 2 GHG emissions	1,000 t CO ₂ eq	418.41					
Gross market-based Scope 2 GHG emissions	1,000 t CO ₂ eq	467.27					
Absolute Scope 1 and Scope 2 emissions (Total) ¹	1,000 t CO ₂ eq	968.82	1,554		777		
Significant Scope 3 GHG emissions							
Total Gross indirect (Scope 3) GHG emissions	1,000 t CO ₂ eq	4,513.84					
1 Purchased goods and services	1,000 t CO ₂ eq	2,596.99					
2 Capital goods	1,000 t CO ₂ eq	208.23					
3 Fuel and energy-related activities ¹	1,000 t CO ₂ eq	321.90					
4 Upstream transportation and distribution	1,000 t CO ₂ eq	485.96					
5 Waste generated in operations	1,000 t CO ₂ eq	38.94					
6 Business traveling	1,000 t CO ₂ eq	0.99					
7 Employee commuting	1,000 t CO ₂ eq	3.96					
9 Downstream transportation	1,000 t CO ₂ eq	820.58					
15 Investments	1,000 t CO ₂ eq	36.29					
Relative Scope 3 emissions per ton of copper cathode ²	CO ₂ /copper cathode	4.12	6.0		4.5		
Total GHG emissions							
Total GHG emissions (location based)	1,000 t CO ₂ eq	5,433.81					
Total GHG emissions (market based)	1,000 t CO ₂ eq	5,482.66					
GHG intensity per net revenue ³							
Total GHG emissions (location-based) per net revenue	t CO ₂ eq/€	0.30	-	-	-	-	-
Total GHG emissions (market-based) per net revenue	t CO ₂ eq/€	0.30	-	-	-	-	-

¹ Progress towards achieving the target is presented in more detail on a calendar-year basis in (Group) Sustainability Statement, E1-4 — Targets related to climate change mitigation and adaptation.

² Refers to internally produced copper cathodes.

³ The calculation of GHG intensity per net revenue is subject to the same assumptions as the energy intensity per net revenue, as detailed in (Group) Sustainability Statement, E1-5 — Energy consumption and mix.

CO₂ emissions in CY 2024

GRI 305-1, GRI 305-2, GRI 305-3

	Unit	2024	2023	2022
Scope 1 (emissions produced as a direct result of burning fuels in internal facilities)	1,000 t CO ₂ eq	496	564	555
Scope 2 (emissions related to purchased energy, e.g., electricity)	1,000 t CO ₂ eq	495	613	679
Total (Scope 1 + 2)	1,000 t CO ₂ eq	991	1,177	1,234
Scope 3 (other indirect emissions)	1,000 t CO ₂ eq	4,548	4,630	4,113

Scope 3 emissions by activity

GRI 305-3

	Unit	2024
Purchased goods and services	%	66.9
Capital goods	%	6.1
Fuels and energy-related activities	%	4.7
Upstream transportation	%	7.8
Generated waste	%	0.9
Business travel	%	0.04
Employees' commuting routes	%	0.1
Downstream transportation and distribution	%	13.5

Reduction in energy consumption and CO₂ emissions through individual projects¹

GRI 302-4, GRI 305-5

	Unit	2024
Total	MWh	11,260
Total	t CO ₂ eq	4,476
New Ebner bell annealer, Aurubis Stolberg (DE)		
– energy reduction	MWh	1,000
– emissions reduction	t CO ₂ eq	455
Optimization of fuel use in burners, Avellino (IT)		
– energy reduction	MWh	3,024
– emissions reduction	t CO ₂ eq	168
Pipe insulation, Avellino (IT)		
– energy reduction	MWh	1,617
– emissions reduction	t CO ₂ eq	90
Replacement of hydraulic pumps' regulation system, Avellino (IT)		
– energy reduction	MWh	865
– emissions reduction	t CO ₂ eq	420
Electrification of subprocesses in wire plant, Emmerich (DE)		
– energy reduction	MWh	1,150
– emissions reduction	t CO ₂ eq	200
Substitution of limestone in furnace, Hamburg (DE)		
– energy reduction	MWh	2,272
– emissions reduction	t CO ₂ eq	2,680
Cooling tower pumps, Hamburg (DE)		
– energy reduction	MWh	682
– emissions reduction	t CO ₂ eq	237
SO ₂ blower in acid plant, Hamburg (DE)		
– energy reduction	MWh	650
– emissions reduction	t CO ₂ eq	226

1. List is not comprehensive and does not include savings through the purchase of renewable energies.

Air emissions

Nitrogen oxides (NO_x), sulfur oxide (SO₂), and dust¹

GRI 305-7

	Unit	2024	2023	2022
NO _x	t	939	805	877
SO ₂	t	4,472	4,799	4,789
Dust	t	61	81	77
Specific dust emissions ¹	g/t multimetal copper equivalent	36	42	40

¹ Values based on multimetal production sites: Hamburg, Lünen, Pirdop, Olen, Beerse and Berango.

Air pollutant emissions

GRI 305-7
ESRS E2-4 — Pollution of air

in kg	2024/25
SO _x	4,091,732
CO	2,956,296
NO _x	862,310
Benzene	1,483
Hg	90
Zn	6,418
Pb	2,215
Cu	4,386
Cd	84
As	311
Ni	61

Water

Water and effluents

GRI 303-3, GRI 303-4, GRI 303-5

	Unit	2024	2023	2022
Total water withdrawal	million m ³	63.0	73.2	70.7
Water withdrawal by source:				
– Surface water	million m ³	60.1	69.8	67.4
– Rainwater	million m ³	0.8	0.9	0.6
– Groundwater	million m ³	0.4	0.4	0.4
– Municipal water	million m ³	1.2	1.8	2.0
– Other ¹	million m ³	0.6	0.4	0.3
Total water discharge	million m ³	57.9	67.5	66.4
Water discharge by destination:				
– Surface water	million m ³	57.7	66.5	65.3
– Municipal wastewater system	million m ³	0.3	1.0	1.1
– Wastewater to third parties	million m ³	<0.1	<0.1	<0.1
Metal emissions to water²	g/t multimetal copper equivalent	0.7	0.6	0.7

¹ Other: distilled water, steam, etc.

² We refer here to the multimetal production sites that discharge directly into water. In Lünen and Berango, wastewater is directed to the public sewer system after being treated at the plant premises and is therefore not included.

Waste

GRI 306-3, GRI 306-4, GRI 306-5

	Unit	2024	2023	2022
Hazardous waste	t	52,828	44,392	47,361
Landfilling	t	40,455	31,976	36,332
Disposal (thermal)	t	128	79	159
Thermal utilization	t	535	721	659
Recycling	t	10,516	10,117	8,035
Internal utilization/recycling	t	1,194	253	1,919
Non-hazardous waste	t	27,972	38,496	38,740
Landfilling	t	379	2,032	2,731
Disposal (thermal)	t	733	628	643
Thermal utilization	t	1,510	939	802
Recycling	t	22,687	33,721	33,828
Internal utilization/recycling	t	2,663	885	664
Construction waste	t	131,019	94,359	126,730

Resource use

Allocation of resource inflows¹

GRI 301-1
ESRS E5-4 — Resource inflows

Total weight of metal-containing inflows (throughput, in dmt)	2024/25
Primary	2,498,401
Secondary	864,709

¹ The proportion of primary and secondary resource inflows cannot be compared to the recycling rate, for example of the cathode. The higher resource inflow from primary sources (concentrates) results from lower copper content on average compared to secondary sources (recycling material).

Recycled content of products (%)

GRI 301-2
ESRS E5-4 — Resource inflows

Recycled content of products (%)	2024/25
Copper cathodes	45
Aurubis Rod (continuous cast wire rod)	38
Aurubis FOXROD (oxygen-free copper wire)	70
Aurubis SHAPES (continuous cast shapes)	36
Aurubis BARS & PROFILES (bars & profiles)	70
Gold	33
Silver	58
Tin	100
Nickel from nickel sulfate	60
Lead	95
Platinum group (PGM) — platinum and palladium	67

Average recycled copper content in copper cathodes in the group in FY 2024/25

in %

Origin of recycling material throughput in FY 2024/25¹

in %

¹ Percentages have been commercially rounded; totals may therefore deviate slightly from 100 %.

Origin of concentrate throughput in FY 2024/25¹

GRI 301-2

in %

To evaluate our environmental protection performance, we carried out a life cycle assessment (LCA) for each of our main products. The results are available on our website [Environmental profiles](#).

¹ Percentages have been commercially rounded; totals may therefore deviate slightly from 100 %.

² All countries with a contribution of less than 3 % are included here.

Biodiversity

Conservation areas in close proximity (copper production sites)

GRI 101-5

	Activities at site	Name	Ecologically sensitive area	Distance to sensitive area	Area type
Hamburg (DE)	Custom smelting & products	Hamburger Unterelbe	Natura 2000	200 – 600 m	Area of biodiversity importance
		Holzhafen	Natura 2000	600 – 1,000 m	Area of biodiversity importance
		Heuckenlock/Schweenssand	Natura 2000	3,600 m	Area of biodiversity importance

Individuals with disabilities

GRI 405-1

in %	2024/25	2023/24	2022/23
Percentage of individuals with a severe disability ¹	4.8	4.8	5.1

¹ For Aurubis AG.

Training metrics

GRI 404-1

ESRS S1-13 — Training and skills development metrics

		2024/25
Employee category	Gender	The average number of training hours per employee
Blue collar	Female	32.5
	Male	22.8
	Other ¹	0.0
White collar	Female	20.7
	Male	22.6
	Other ¹	0.0
Total		22.8

¹ We currently do not record a third gender in the group globally. We will review the relevance of the category for future external reporting.

Work–life balance metrics

GRI 401-3

in %	2024/25
Employees entitled to take family-related leave	99

Occupational health and safety

Occupational safety metrics

GRI 403-9, GRI 403-10
ESRS S1-14 — Health and safety metrics

	2024/25
The number of fatalities as a result of work-related injuries and work-related ill health¹	1
of which fatalities of own workforce	0
of which fatalities of temporary workers and employees of external companies	1
Number of recordable work-related accidents²	316
of which recordable work-related accidents of own workforce	234
of which recordable work-related accidents of temporary workers and employees of external companies	82
Rate of recordable work-related accidents³	18.9
Rate of recordable work-related accidents of own workforce	22.7
Rate of recordable work-related accidents of temporary workers and employees of external companies	12.8

¹ Includes all employees working at Aurubis sites. Temporary workers are employed by a temporary employment agency and not by Aurubis directly. Managerial authority is transferred to the hirer (Aurubis), who is responsible for health and safety. An employee of an external company, on the other hand, is a person who is directly employed by a legal entity and is contracted by Aurubis to perform work or deliver services.

² Recordable work-related accidents within the meaning of the ESRS include all work-related incidents that lead to injury or illness and require medical treatment beyond first aid and/or absence from work. The German definition of “recordable accidents/incidents” (accidents with personal injury and more than three lost work shifts) differs from the international definition of “recordable incidents/accidents” and as such cannot be directly compared.

³ Recordable accidents per 1 million hours worked.

Other occupational safety metrics

GRI 403-9, GRI 403-10
ESRS S1-14 — Health and safety metrics

	Unit	2024/25	2023/24	2022/23
Employees				
Absolute number of accidents ¹	Number	36	33	34
– of which fatal accidents	Number	0	3	0
LTIFR	Rate	3.5	3.1	3.2
Severity rate	Rate	0.19	0.20	0.27
Total hours worked	Number	10,311,489	10,854,359	10,335,754
Temporary workers				
Absolute number of accidents	Number	2	5	4
– of which fatal accidents	Number	0	0	0
LTIFR	Rate	7.6	17.5	16.0
Contractors				
Absolute number of accidents	Number	10	19	12
– of which fatal accidents	Number	1	1	0
LTIFR	Rate	1.6	3.8	2.8

¹ Accidents with lost time of at least one full shift, including fatalities. Minority shareholdings not included.

Human rights in own operations

Incidents, complaints and severe human rights impacts

GRI 2-27, GRI 406-1
ESRS S1-17 – Incidents, complaints and severe human rights impacts

	2024/25
Total number of incidents of discrimination, including harassment	12
Number of complaints filed through channels for people in own workforce to raise concerns (excluding discrimination) ¹	5
Number of severe human rights incidents connected to the undertaking's workforce, such as forced labor, human trafficking, or child labor ¹	0

¹ We also consider complaints that have been submitted to the national points of contact for multinational OECD undertakings regarding defined topics, though cases that have already been reported are excluded. No complaints were submitted in fiscal year 2024/25.

Responsible sourcing

in %	2024/25
Buyers of raw materials who have received training on responsible sourcing ¹	100
Long-term primary raw material contracts that include contractual safeguards on environmental protection, safety and human rights	100

¹ The training covers a range of topics, including responsible sourcing and supply chain due diligence, human rights and labor practices, environmental topics, conflict minerals, and legal compliance. It also addresses Aurubis' responsible sourcing management system, including policies and commitments; grievance mechanism; functionality and purpose of the Business Partner Screening Process; prevention and mitigation approaches; assurance; reporting; and other specific supply chain topics related to gold, silver and tin. The training content is shared with independent third party auditors in order to confirm Aurubis' compliance with internationally recognized frameworks.

Social engagement

Total expenditure for social engagement and regional distribution in FY 2024/25^{1, 2}

GRI 203-1
in %

¹ Percentages have been commercially rounded; totals may therefore deviate slightly from 100 %.
² The total expenditure mainly comprises sponsorship contributions and donations.

Governance

Association work and political lobbying

GRI 2-28

Aurubis considers transparent and responsible political engagement an essential element of its corporate governance. Through its Corporate External Affairs department, reporting directly to the CEO, the company coordinates and conveys its positions to political and regulatory stakeholders at local, national and European levels. The department works closely with internal experts to prepare briefings, public statements, and policy contributions. Aurubis engages in independent lobbying based on its Corporate External Affairs Policy and participates actively in industry associations to shape policy through constructive dialogue with stakeholders from business, science and civil society.

The company maintains representative offices in Brussels and Berlin, enabling continuous communication with EU and German political institutions, as well as in local communities near its production sites. In the reporting year, a key lobbying focus was securing a sustainable and competitively priced energy supply. Aurubis collaborates with associations like the BDI, VCI and BDE to shape energy and climate policy. Committed to transparency, the company discloses its lobbying expenses in the EU and German transparency registers and publishes its consultation contributions on the European Commission's website.

Our contributions to public consultations at the EU level are accessible on the European Commission website www.commission.europa.eu/about/service-standards-and-principles/transparency/consultations_de.

Aurubis is included in the EU Transparency Register transparency-register.europa.eu, which publishes expenditures for lobbying at the European level. Aurubis is also included in the German lobbying transparency register www.lobbyregister.bundestag.de. In the 2023/24 fiscal year, Aurubis spent €970,001 to €980,000 on the representation of interests in Germany and €400,000 to €499,999 on the representation of interests in Europe. Aurubis does not donate to any political parties or candidates.
